SUMMARY

Tracks about 400 shipments a day across 12 carriers at a regional freight company and sends the ops manager a weekly report on late deliveries. Over four years in freight operations, working in Excel, Power Query and basic SQL.

EXPERIENCE

Operations Coordinator | **Regional freight and logistics company (about 300 employees)** | Jun 2022 - Present

- Traced one carrier's late Dayton terminal loads to its Friday pickups in six months of Excel data; after the team moved them to another carrier, on-time delivery there went from 81% to 93% over about three months.
- Presented the Friday pickup finding to the operations manager and the terminal manager.
- Built the Monday late-delivery report in pivot tables and Power Query; it took half a day, now about 40 minutes.
- Track about 400 shipments a day across 12 carriers and resolve delivery issues with carriers and customers.
- Write simple SQL queries against the shipment database a few times a week.
- Trained four new coordinators.

Customer Service Representative | **National grocery delivery service** | Aug 2020 - May 2022

- Answered about 60 calls and emails a day about late or missing orders.
- Kept a spreadsheet of their most common causes, which the supervisor started using in the weekly meeting.

Shift Lead | **Fast-casual restaurant chain** | 2018 - 2020

- Supervised staff and handled cash.

SKILLS

Excel (pivot tables, Power Query), SQL (basic)

EDUCATION

BA Business Administration, large public state university, 2020
